

## Single Source for Cables Simplifies Medical Purchasing

Bioconnect, a San Diego based biomedical patient cable manufacturer, has now added SpO<sub>2</sub> sensors to its product line. Medical cables and leadwires that connect hospital equipment to patients has been Bioconnect's manufacturing niche since it was founded in 1989. With the addition of SpO<sub>2</sub> sensor cables, hospital purchasing agents now have the convenience of ordering all these products from a single source, thereby, simplifying the buying process.

Bioconnect SpO<sub>2</sub> sensors are designed and manufactured in the U.S. The variety of SpO<sub>2</sub> products carried include: finger sensor cables for adults, small adults, juveniles, and pediatrics. Ear, omni-site and veterinary sensors are also available. The product line is rounded out with fetal cables, extensions cables, adapter cables, repair kits and accessories.

Bioconnect has provided high quality, American made patient medical cables since 1989. It is a division of RF Industries (NASDAQ RFIL), a leading supplier of connection products through its operating divisions for the telecommunications and medical markets. For more information and product specifications, please contact Scott Lende of Bioconnect at (888)775-2372, (858)549-6340, [slende@biocables.com](mailto:slende@biocables.com) or visit our website at [www.biocables.com](http://www.biocables.com).
