NEW PRODUCT RELEASE

Precision 7-16 DIN Adapters Holds up to Repeated Mating Cycles

7-16 DIN adapters are highly desired in test applications such as base station passive intermodulation (PIM) testing. These low loss, low VSWR adapters are designed to be used with portable antenna and cable analyzers. Anritsu's Site Master™, Summitek's SI™ series and Boonton's PIM testers are examples where high grade DIN adapters are used. The **P2RFA-4013-SS**, 7-16 DIN Precision Adapter Kit, gives you six of the most needed 7-16 DIN and N adapters for bench and field use.

All 7-16 DIN adapters are machined to exacting specifications with White Bronze plated bodies and Stainless Steel coupling nuts for tarnish free service and superior electrical performance along with low PIM. White Bronze plating offers a non-magnetic solution while retaining high conductivity in the conductor paths. Engineered for long life in field applications, they are also suitable for lab environments.

Adapters in the P2RFA-4013-SS kit are:

- P2RFD-1652-SS — 7-16 DIN Male to 7-16 DIN Female Right Angle; White Bronze, Stainless Steel Coupling Nut
- P2RFD-1653-4 — 7-16 DIN Female to 7-16 DIN Female; White Bronze
- P2RFD-1670-SS — 7-16 DIN Male to N Male; White Bronze, Stainless Steel Coupling Nut
- P2RFD-1671-SS — 7-16 DIN Male to N Female; White Bronze, Stainless Steel Coupling Nut
- P2RFD-1672-SS — 7-16 DIN Female to N Male; White Bronze, Stainless Steel Coupling Nut
- P2RFD-1673-4 — 7-16 DIN Female to N Female; White Bronze

RF Connectors is a division of RF Industries (NASDAQ RFIL), a leading supplier of connecting solutions provided through its operating divisions: RF Connectors, RF Cable Assembly, Aviel Electronics, RF Neulink, RadioMobile, OddCables.com, RF Precision Products and Cables Unlimited.
