RF NEULINK Receives Initial \$335,000 Contract to Support US Marine Corps' IGRS Program

RadioMobile Receives \$138,000 Add-on Contract

SAN DIEGO, CALIFORNIA, February 20, 2008 . . . **RF INDUSTRIES'**, (NASDAQ:RFIL) RF Neulink Telemetry Division today announced it has been awarded an initial \$335,000 Contract to support the United States' Marine Corps' Integrated GPS Radio System (IGRS).

Robert White, Neulink's Sales and Marketing Director said, "The IGRS is an advanced personnel tracking system which will provide the USMC with GPS-based real-time tracking, position and status information for personnel engaged in battlefield activities. We hope to announce further contracts for this project later this year."

RF Industries also announced that its RadioMobile Division received a \$138,000 Add-on contract from London, England-based Dial-a-Cab for 100 mobile data transceivers with GPS enabling software. The contract includes additional RF base stations and an upgrade to two remote RF base stations for TCP/IP network connectivity.

James Moore, RadioMobile's General Manager said, "This add-on contract is part of a long-term strategic plan co-developed with Dial-a-Cab to support their fleet with new technology and features. One of RadioMobile's major strengths is the ability to upgrade our clients' existing equipment, and speed their adoption of high performance technologies, with minimal interruption in their businesses and services.

About RF Industries

The RF Connectors and Cable Assembly division designs and distributes radio frequency (RF) coaxial connectors and cable assemblies used for Wi-Fi, PCS, radio, test instruments, computer networks and antenna devices. Aviel Electronics provides custom microwave and RF Connector solutions to aerospace, OEM and Government agencies. Worswick provides coaxial connectors and cable assemblies primarily to retail and local multi-media and communications systems customers. Neulink designs and markets wireless digital data transmission products for industrial monitoring, wide area networks, GPS tracking and locations systems. RadioMobile is an OEM provider of End-to-End mobile wireless network solutions for public safety, emergency medical, Transportation and industrial customers. RFI's Bioconnect operation designs, manufactures and distributes specialized electrical cabling and interconnect products to the medical monitoring market.
