RF Industries Acquires RadioMobile Inc.

SAN DIEGO, CALIFORNIA, September 10, 2007 . . . **RF INDUSTRIES, LTD., (NASDAQ:RFIL)** today announced that it acquired on September 1, 2007, for cash and equity consideration valued at approximately \$700,000, the assets of RadioMobile, Inc., a privately held San Diego, California-based supplier and system integrator of custom wireless data and transceiver products. Radio Mobile revenue exceeds \$700,000 since January, 2007.

"RadioMobile has a five-year history supplying "End-to-End" mobile management solutions over wireless networks. This acquisition, combined Neulink's industry leading modem products, enables RFI to enter and successfully compete in the design and marketing of mobile wireless communications systems. We are delighted that Jim Moore, Radio Mobile's principal officer with 30 years experience in wireless systems development with companies like Federal Express and Qualcomm, will join RFI as president and general manager of our RadioMobile Division," said Howard Hill, president of RF Industries.

Jim Moore, president of RadioMobile said, "I feel very good about this acquisition. RF Industries has the depth and resources to enable RadioMobile's growth to the next level. From the small municipality to the largest of enterprises, wireless customers are demanding cost effective solutions to improve user safety, productivity and response time. RadioMobile, in combination with the technologies of RFI's NeuLink Division, will be able to field products that are in sync and provide a broad range of systems solutions to the challenging wireless market."

About RadioMobile

RadioMobile (RM) is an OEM provider of End-to-End mobile wireless network solutions for public safety, emergency medical, Transportation and industrial customers. Products include proprietary software and a wide range of wireless equipment tailored to maximize wireless, WiFi and public access networks. RM has systems installed using conventional wireless networks, EDACS, CDMA, GPRS, 802.11x, Mobile satellite L band, Trunked analog, MP-1327 and TCP/IP systems. Applications include mobile hardware terminals with Windows-based mobile messaging, Automatic Vehicle Location, mobile mapping and host message switching, archiving and map display. RM has a loyal customer base dating back to the early 1990's.

About RF Industries

The RF Connectors and Cable Assembly division designs and distributes radio frequency (RF) coaxial connectors and cable assemblies used for Wi-Fi, PCS, radio, test instruments, computer networks and antenna devices. Aviel Electronics provides custom microwave and RF Connector solutions to aerospace, OEM and Government agencies. Worswick provides coaxial connectors and cable assemblies primarily to retail and local multi-media and communications systems customers. Neulink designs and markets wireless digital data transmission products for industrial monitoring, wide area networks, GPS tracking and locations systems. RFI's Bioconnect operation designs, manufactures and distributes specialized electrical cabling and interconnect products to the medical monitoring market.
