

NEW PRODUCT RELEASE

Kit Simplifies Installation of N Male Connectors

Correct connector installation with the proper tools is critical to wireless system performance. With that in mind, RF Connectors has introduced the RFA-4511 Series, a comprehensive installation kit series for crimping N-type connectors onto LMR-400® or equivalent cables. The kit combines a cable cutter, one-step cable stripper, the Cable Devil® preparation tool, professional grade crimp tool and die, and 25 N male connectors. All are housed in a rugged, foam lined case with installation instructions.

RF Connectors is a division of RF Industries (NASDAQ RFIL) a leading supplier of connecting solutions provided through its operating divisions: RF Connectors, RF Cable Assembly, Aviel Electronics, RF Neulink, RadioMobile and Worswick/OddCables.
