NEW PRODUCT RELEASE

Improved Environmental Performance for Solderless N Connector

The majority of N type connectors are installed at remote sites exposed to the environment. The RF Connectors Division of RF Industries offers an improved N male connector for high performance .400 inch diameter cables. Part number RFN-1006-I-WB features white bronze plating for a non-tarnish finish with enhanced electrical performance. The plating is ferrous metal free, which reduces inter-modulation interference. A ridged back end provides better sealing for the heat shrink boot included with the connector. A combination hex/knurl coupling nut allows for wrench or finger mating. The connector may be attached to multiple brands of high performance cables including Times LMR®-400, Andrew CNT®-400, CommScope WBC®-400 and Belden® RF-400. The connector is assembled with industry standard crimp tools with .429 inch and .118 inch hex dies. The contact design includes a “weep hole” for optional solder installation.

Available from RF Connectors Distributors throughout the world. For additional information call 800-233-1728 or 859-549-6340. You can also e-mail: RFI@rfindustries.com. Visit our web site at www.rfindustries.com.

RF Connectors is a division of RF Industries (NASDAQ RFIL) a leading supplier of connecting solutions provided through its operation divisions: RF Connectors, RF Cable Assembly, Aviel Electronics, RF Neulink, RadioMobile and Worswick/OddCables.
